## Green Tips of the Month

### See How Much Energy Your Individual Appliances Are Using

Ever wonder if your refrigerator is really running you into the poor house? Is your computer or TV silently sipping electricity when you are not using it? What is the lamp you just replaced with an energy-saving compact fluorescent lamp saving you? Now you can find out with the P3 Kill-a-Watt Meter -- available on loan from Town of Brookeville -- and make energy efficiency changes to decrease your overall electricity use.

The Town has a *Kill A Watt EZ* Electricity Usage Monitor, model P4460. It will be loaned to Town Residents who would like to find out how much power they are using in their day to day lives. Simply connect your appliances to the Kill-a-Watt electricity usage monitor and it will assess how efficient they really are. The unit's large LCD display counts consumption by the kilowatt-hour, the same as Pepco.
